Automatic Pocket Folding Machines FA 35/10-4 K- FL2-35 VARIABLE FA 43/10-4 K- FL2-43 VARIABLE

FA 35/10-4 K- FL2-35
FA 43/10-4 K- FL2-43
with Station II at right angles

- Automatic flat pile feeder with separating head and lateral blowers in new technique
- Solid construction
- Easy to handle thanks to a swivelling separating head
- Long alignment table for sheet lengths up to 85 cm
- Highest cycles output, infinitely variable and digital sheet distance regulation
- Massive knife shafts \varnothing 40 mm
- Available with 4 – 12 folding pockets/station
- Combination folding pockets with exchangeable plastic rings
- Synchronous, silent drive by means of hardened, spiral toothed and grinded steel gears
- Smallest fold of 15 mm

FA 35/10-4 K- FL2-35
FA 43/10-4 K- FL2-43
with Station II in line

- A modular system enables the attachment of this combination in different variations
- Different delivery units
- Installation of glueing devices
- Additional folding mechanisms
- External operating panel to control the feeder from the delivery's position
- Installation of code readers and ejection device

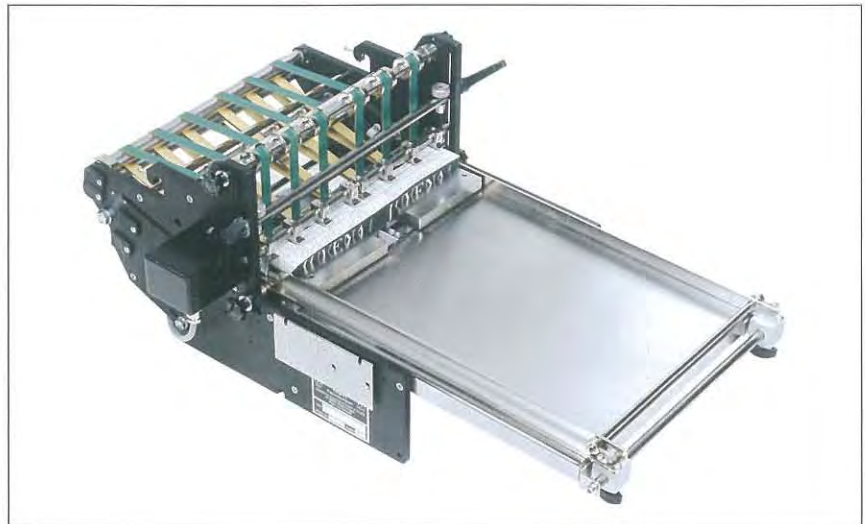

FA 35/4 Station II

This station can also be used as Station III

- With 4–12 folding pockets
- New roller table with narrow roller distances for pharmaceutical leaflets
- Special folding pockets with narrow guiding rods for smallest formats
- Solid construction
- Precision-slide-bearings for the folding rollers for highest accuracy in folding operations

Vertical stacker KS 310

Knife folding unit EK 300
also available with glueing device

Chute delivery S 350
also available in mobile version

Technical data

Max. format Station I:

FA 35/4	35 x 85 cm
FA 43/4	43 x 85 cm
FA 35/6	32 x 85 cm
FA 43/6	41 x 85 cm
FA 35/8 up to 35/12	35 x 85 cm
FA 43/8 up to 43/12	43 x 85 cm

Min. format Station I:

Flat pile feeder FL2-35
10.5 cm wide x 14.5 cm long

Max. format Station II:

FA 35/4	35 x 50 cm
FA 43/4	43 x 50 cm
FA 35/6	32 x 50 cm
FA 43/6	41 x 50 cm
FA 35/8 up to 35/12	35 x 50 cm
FA 43/8 up to 43/12	43 x 50 cm

Min. format Station II:

FA 35/4 up to 35/12 5 x 10 cm

Smallest fold: 15 mm

Output: 130 m/min.

up to approx. 40,000 sheets/hour,
depending on the format

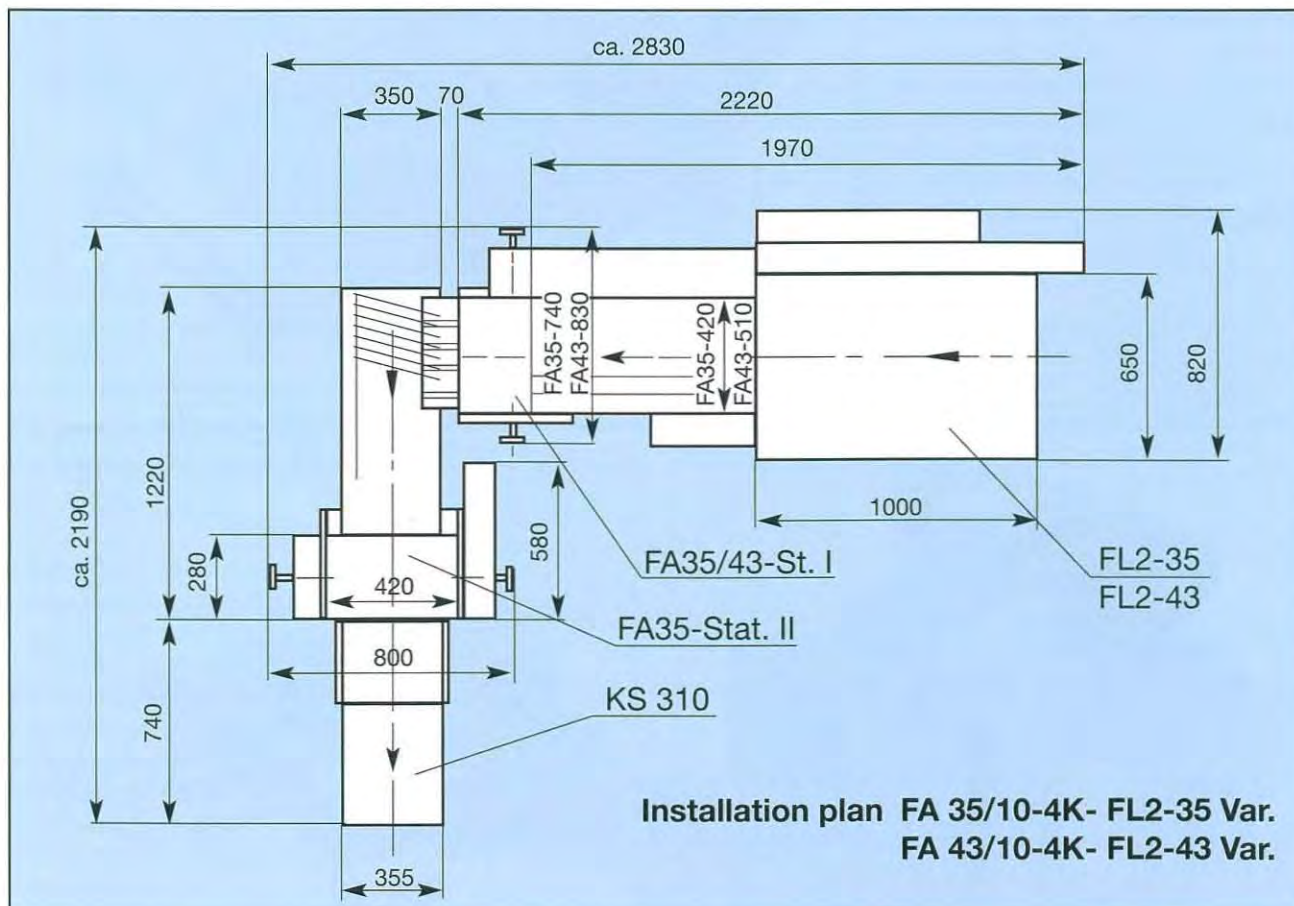

Accessories

- Code reader for single- and double sided reading
- Ejection device in connection with the core reader
- Glueing device
- Strip cutting device
- Separating cutting device
- Edge cutting device
- Crimping device
- Grooving device
- Batch counter
- Double sheet detector
- Ejector for vertical stacker
- Knife folding mechanism EK 300
- Mobile chute delivery S 350/2
- Chute delivery to be hooked-on with independent motor drive
- Vertical stacker KS 310, KS 310/2 and KS 310/3
- Intermediate transport ZWT 35/2 respectively ZWT 43/2 as transfer unit between Station I and II
- Gate folding pocket

Additions to the supply schedule

Combination folding machines or pocket folding machines for formats of 6 x 6.5 cm up to 74 x 104 cm
Over 100 models available
Leaflet folding machines for the installation on packaging machines working either from the pile or from the roll

Mailing plants in several variations
Special machines on the basis of customers' requirements
Please get in touch with us – we will solve your folding problems!
